

2019 CIGRE CANADA CONFERENCE & EXPO

September 16-19, 2019 Le Westin Montréal Québec, Canada www.cigre.ca

Innovation at the Heart of Power Grid Transformation

Want to make your substations safer, smarter and more efficient? Discover digital substations.

As power generation sources become increasingly distributed, intermittent and volatile, achieving the levels of control and performance needed requires a more intelligent, efficient, and reliable grid. This is now possible with digital substations.

Built on the international standard IEC 61850, ABB's world-leading digital substations achieve new heights in reliability, interoperability and real-time performance. The digital substation can save lives, while bridging the gap between the equipment of the process bus level and the station level.

Learn more at new.abb.com/grid/technology/digital-substations

Also, attend our workshop on **Thursday, September 19** at CIGRE Canada!

ABB

This ain't your grandma's grid.

Power systems around the world are changing rapidly. Factors like new generation sources, digitalization, and evolving consumer expectations challenge legacy systems every day. The electricity experts at PSC help hundreds of clients safely deliver reliable power to billions of people in twenty five countries.

PSC has been supporting clients and delivering complex projects on time and within budget since 1995. How can our experience and global perspective help you?

WELCOME MESSAGE FROM GENERAL CHAIR

On behalf of the members of the CIGRE Canada committee and Hydro-Québec, I would like to officially welcome you to the 14th Annual CIGRE Canada Conference on Power Systems. Hydro-Québec is proud to host this important event, which will bring together many major players in the energy sector. From September 16 to 19, business leaders, manufacturers, engineers, regulators and academics will come to Montréal to discuss the latest technical and technological breakthroughs as well as major trends in the power industry.

In recent years, Montréal has garnered a reputation for being a high-tech centre of excellence and an innovation hub, becoming in the process a global leader in artificial intelligence. The theme of this year's conference could therefore not be more appropriate: Innovation at the heart of power grid transformation.

Innovation must be a top priority given that all aspects of tomorrow's power grid will incorporate digital technologies, enabling interactive features that promote customer participation. Regardless of your role in the industry, I am sure you share my conviction that the effects of this changing reality are already being felt. This shift pushes us to question our methods, review our current paradigms and rethink our strategies. However, in spite of the very real business challenges resulting from the transformation of our industry, I personally see a remarkable opportunity to draw on our expertise and demonstrate creativity through innovation.

Therefore, in the era of transportation electrification, digital transformation and home automation, it is the ideal time to meet and share our knowledge, know-how and innovative practices in order to ensure that the power grid evolves and adapts to the reality of tomorrow. The 2019 CIGRE Canada Conference will provide a unique forum for enriching discussions and new ideas, where you will have the opportunity to learn from your peers on topics of interest including efficient electrification, customer empowerment, asset management and the smart power grid.

I also sincerely hope that you will be able to discover all that Montréal has to offer or perhaps get reacquainted with our cosmopolitan city whose European charm and North American enthusiasm have made it world renowned. When you're not at the conference, I encourage you to discover our local culture by visiting the city's various neighbourhoods and their many shops, art galleries, museums and restaurants.

I'm looking forward to seeing you there!

Yours truly,

Marc Boucher
President, Hydro-Québec TransÉnergie

A DYNAMIC CONFERENCE PROGRAM

The 2019 edition of the CIGRE Canada conference is innovating to reach out and connect the various players in the industry and electric utilities in the context of the remarkable global evolution of power grids in recent years, which will continue in coming years with the gradual liberalization of electricity markets and the penetration of renewable energies into the electricity grid.

The conference will begin with our keynote speaker, Éric Martel, President and CEO of Hydro Quebec, and will follow with a technical panel composed of industry leaders, accompanied by Denis Tremblay, President and CEO of AIEQ, as moderator. AIEQ has joined CIGRE Canada for this year's conference.

Thanks to the volunteer efforts of a very dynamic core (Kasun Samarasekera, Aleks Modelewska and Farhad Yahyaie), we will be inaugurating a networking activity for the new generation of Cigreans (35 and under). Scientific papers by the Next Generation Network (NGN) and students will be evaluated and prizes will be awarded for both groups at the conference banquet.

During Tuesday's lunch break, Robyn Koropatnick will facilitate a Women in Engineering activity, bringing quality guests to the forefront and providing opportunities for women to share and learn from these inspiring leadership journeys. Women are often underrepresented in our sector of activity and this forum aims to recognize the excellence of their contributions and their know-how so as to promote the advancement of women in the electricity sector.

Five technical seminars will take place on Monday prior to the day's conference, along with three workshops on Thursday following the day's conference, all in addition to the various papers to be presented over the span of the conference. These activities are golden opportunities to gain further knowledge and insight in your areas of interest.

Two visits to the Varennes site of the Hydro-Québec research institute (IREQ) are also on the agenda. Hydro-Québec is the only utility in North America to have a research center as large as IREQ, spending an average of \$100 million a year on its innovation projects. The work at IREQ makes it possible to:

- Extend the useful life of equipment
- Increase equipment performance
- Optimize maintenance
- Support energy efficiency programs and improve customer service

We invite you to participate in this unique forum in large numbers and are eager to see you at the CIGRE Canada 2019 conference.

MESSAGE FROM TECHNICAL COMMITTEE CHAIR

On behalf of the Technical and Organizing Committees, I am pleased to welcome you in Montréal to the 14th Annual CIGRE Canada Conference on Power Systems. At the first stage of the selection process, 146 abstracts were received. Then, 102 papers from 13 countries made it to the conference final program inside 22 technical sessions. In the figure below is presented the distribution of the 102 papers by country, based on the country of the principal author of a paper.

I would like to express my sincere appreciation to the 38 technical committee members for the exposure given to the Call for Papers through the industry, research centres and universities. I am grateful for their time, efforts and expertise provided during the contribution evaluation process. Also, special thanks to the authors for their significant contributions that make the technical program highly relevant to participants.

Jean-François Allan
 Technical Committee Chair
 Research Scientist, Institut de recherche d'Hydro-Québec

16:30	16:45	Networking Break <i>8th floor, Grande Place</i>		
16:30	17:15	Award Presentation of the Best Papers and Closing Session Award of the Best Student Paper – Award of the Best NGN Paper – Prize draws <i>11th floor, Foyer Montreal</i>		
19:00	21:30	Next Generation Network (NGN) Social – Networking and cocktails Air rooftop terrace, Renaissance hotel, 1250 Robert-Bourassa boul., Montreal, Qc H3B 3B8		

Time		Thursday September 19, 2019	
08:00	12:00	Tutorial ABB <i>8th floor, room Ramezay</i>	Tutorial Siemens <i>8th floor, room Palais</i>

DETAILED AGENDA

Social Events

Welcome Reception

Monday September 16, 2019 | 18:00 – 20:00, 11th floor, room Montreal

Le Westin Montréal, Casual dress

Get the conference off to a great start by networking with your colleagues over a glass of wine and collecting your registration materials.

Cocktail Reception

Tuesday September 17, 2019 | 17:45 – 19:00, 8th floor, Grande Place

Le Westin Montréal, Business casual

Enjoy a beverage while networking with the exhibitors and your colleagues before the banquet.

Banquet

Tuesday September 17, 2019 | 19:00 – 22:00, 11th floor, room Montreal

Le Westin Montréal, Business casual

The conference banquet is an evening of fine dining and stimulating conversation, providing an opportunity to salute the work accomplished during the conference. Network with participants and enjoy the entertainment.

The finalists for the Best Student Paper Award and the Best NGN Paper Award will be presented during the banquet.

This recognition consists of a personalized certificate for each finalist.

Awards Presentation

Wednesday September 18, 2019 | 16:45 – 17:15, 11th floor, room Montreal

Le Westin Montréal, Business casual

In recognition of their outstanding contributions for the 2019 CIGRE Canada Conference, a Best Student Paper Award and a Best NGN Paper Award will be presented to the author(s) of a student and an NGN paper, based on the quality of the full paper and the presentation.

2019 CIGRE Canada Conference Best Student Paper Award

This award consists of a personalized certificate and a cash award in the amount of \$1,000.

2019 CIGRE Canada Conference Best NGN Paper Award

This award consists of a personalized certificate and a cash award in the amount of \$1,000.

Sponsored by CIGRE Canada

WIE Luncheon

Tuesday September 17, 2019 | 12:00 – 13:15, 9th floor, room Ville-Marie

CIGRE Canada Women in Engineering is pleased to host a panel discussion during the WIE Luncheon:

Over the past 30 years there have been numerous initiatives attempting to increase the participation of women in engineering.

The concepts of inclusion and diversity, in addition to recognition of how engineering solutions can be improved when the design team better reflects society, are being discussed now more than ever by engineering students, professors, professionals, and the general public.

This session will consider where our influential panelists started their careers, where they are in their careers at present and what initiatives are being considered and, what their hopes are for the future including concepts that can be implemented to achieve gender parity within the engineering profession.

12:00	12:30	Lunch served to all in attendance at approximately 12:05	
12:30	12:38	Welcome from the moderator and introduction of panelists	Robyn Koropatnick, Vice President, Business Development, Teshmont Consultants LP
12:38	13:13	WIE Panel ‘Past, Present and Future’ Roundtable theme	Kathy Baig, President, Ordre des ingénieurs du Québec (OIQ) Nathalie Pilon, ABB Canada President Arielle Kadoch, Stantec Principal Sector Leader, Power T&D Canada East Moderator: Robyn Koropatnick, Vice President, Business Development, Teshmont Consultants LP
13:13	13:15	Closing remarks	Robyn Koropatnick, Vice President, Business Development, Teshmont Consultants LP

CIGRE Canada NGN

CIGRE Canada Luncheon

Wednesday September 18, 2019 | 12:00 – 13:15, 8th floor, room Ramezay

12:00	12:10	Welcome	Aleks Modelewska, Business Development, Digital Engineering
12:10	12:20	Note from CIGRE Canada President	Mike Bartel, Vice President, Asset Management, Altalink
12:20	12:30	Note from CIGRE President	Rob Stephen, GM Master Specialist Technology Group, ESKOM <i>(Via Letter read by Aleks Modelewska, Digital Engineering)</i>
12:30	12:40	Ice breaker intro	Farhad Yahyaie, Senior Engineer, Power System Studies, Powertech Labs Ani Chopra, Lifecycle Maintenance EIT, Altalink Brendan Kelly, Smartwires Kurtis Martin Sturmey, Utility Project Lead, METSCO
12:40	13:15		Ice breakers

CIGRE Canada NGN Social

Networking and cocktails – Come out for a great time!

Wednesday September 18, 2019 | 18:00 – 20:30

Air rooftop terrace, Renaissance hotel, 1250 Robert-Bourassa boul., Montreal, Qc H3B 3B8

18:00	18:10	Welcome	Aleks Modelewska, Business Development, Digital Engineering Farhad Yahyaie, Senior Engineer, Power System Studies, Powertech Labs Ani Chopra, Lifecycle Maintenance EIT, Altalink Brendan Kelly, Smartwires Kurtis Martin Sturmey, Utility Project Lead, METSCO
18:10	20:00		Mingling

Technical Tour

Hydro-Québec's Research Institute - IREQ

Monday September 16, 2019

First visit : 8:00 – 12:00

Second visit : 13:00 – 17:00

Departures and arrivals at the main entrance of the hotel Le Westin

Hydro-Québec's research institute, IREQ, is one of the largest integrated electrical research and testing centres in North America. Created in 1970, IREQ has developed large-scale expertise in electrical apparatus, network analysis and control, automation and measurement, materials, chemical and mechanical engineering, and applications of electricity. It has impressive facilities at its disposal: distribution tests lines, high-voltage laboratory, a power system study and simulation centre and an electrotechnology laboratory, as well as numerous specialized laboratories, notably in robotics, battery materials and mechanical engineering. It has also an extensive three-span mechanical test line to study vibration phenomena. Before you begin the tour of our facilities, a short presentation will give you an overview of Hydro-Québec's grid.

IREQ has facilities in Varennes, some 45 minutes from downtown Montréal.

Don't miss this great opportunity!

*For summary verification purposes, all visitors must provide at the moment of the registration to the visit the following information; those who fail to provide it will unfortunately not be able to attend the visit.

* Complete Name, Date of birth, Passport number, Country emitting the passport

CIGRE Workshops

B2.48 Experience with the mechanical performance of non-conventional conductors

Monday September 16, 2019 | 8:30 – 9:30, 9th floor, room St-Antoine

Presenter: Pierre Van Dyke, Hydro-Québec Research Institute (IREQ)

Bottlenecks in transmission and distribution grids are causing more and more precarious situations. Non-conventional conductor change may become an attractive option to increase the capacity. This can offer higher capacity without weight penalty and higher ampacity limits with limited or no structure changes. The use of high temperature conductors with high ampacity rating, small diameter (to stay below existing wind load limits), light weight and reduced sag characteristics can be attractive.

B2.44 Coatings for protecting overhead power network equipment in Winter Conditions

Monday September 16, 2019 | 9:45 – 10:45, 9th floor, room St-Antoine

Presenters: M. Farzaneh, Consultant, H. Gauthier, Hydro-Québec Research Institute (IREQ)

The application of superhydrophobic and glaciophobic coatings could offer a number of opportunities to improve the performance of power network equipment subjected to icing. This tutorial is based on the work of CIGRE Working Group B2.44 as reported in CIGRE Technical Brochure 631 entitled Coatings for Protecting Overhead Power Network Equipment in winter conditions. The presentation deals with state-of-the-art activities related to techniques for protecting power network equipment including insulators, ground wires and conductors under icing conditions.

Asset management and its importance for electric power utilities

Monday September 16, 2019 | 11:00 – 12:00, 9th floor, room St-Antoine

Presenter: D. Komljenovic, Hydro-Québec Research Institute (IREQ)

The tutorial presents the basic concept and overview of asset management and asset management system such as defined in ISO 5500x. Asset management is described and discussed in a proper context of operational and business complexity including associated challenges to this context. The presentation highlights the difference between notions of "Asset management" and "Managing assets". Current developments and trends in this field are presented in both electrical power industry and elsewhere including potential benefits from implementing a structured asset management system. Some practical experience from industry is also described. Factors of success and potential traps are stressed.

C6 Impact of Distributed Energy Resources (DER) on transmission grid operations and control

Monday September 16, 2019 | 13:30 – 14:30, 9th floor, room St-Antoine

Presenter: M. de Montigny, Hydro-Québec Research Institute (IREQ)

In the context of the energy transition, Hydro-Québec must carry out impact studies of distributed energy resources (DER) on grid operations and control. Those studies require a tool capable of representing the behaviour of the operators and grid control systems in the context of network planning. The work done in the SIRE project for the integration of wind power is presented and serves as a basis for the development for a new DER impact assessment tool on Hydro-Québec transmission network.

C5 Regulation and market design barriers preventing to capture all the value from fast and high locations freedom energy storage

Monday September 16, 2019 | 14:45 – 15:45, 9th floor, room St-Antoine

Presenters: Kankar Bhattacharya (CA), Jarrad Wright (ZA) and Arnaud Banner (FR), supported by Anant Venkateswaran (US)

In order to sustain the integration of a high share of renewable energy sources, there is an increased need for flexibility in power systems, creating value for new storage technologies. However, disruptive technology features are susceptible of revealing limitations of existing regulations and markets, simply because those were designed consistently with conventional generation, before these features even existed at industrial scale. This tutorial presents the results of the working group C5.25 which identifies regulation and market design barriers preventing to fully capture the value from “new” energy storage technologies, faster and with higher-location-freedom than conventional power generation assets. A theoretical analysis of potential value streams and barriers was performed together with a practical inventory for 14 countries, leading to four main recommendations.

08:10 – 08:30 Tuesday, September 17, 2019

Montreal Conference Room – 11th Floor

Innovation at the Heart of Power Grid Transformation

Éric Martel , Président & CEO
Hydro-Québec

Business Panel

08:30 – 10:00 Tuesday, September 17, 2019

Montreal Conference Room – 11th Floor

Power grid transformation

Business Panel – Transformation of the electricity network

Marc Boucher, President of Hydro-Québec TransÉnergie

Gaétan Thomas, President and CEO NB Power

Mark Lauby, Senior vice president and chief reliability officer NERC

Moderator: Denis Tremblay, President and CEO AIEQ

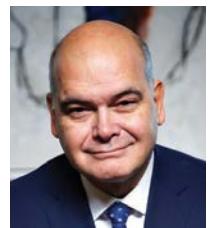

Marc Boucher

Gaétan Thomas

Mark Lauby

Denis Tremblay

Presentation summary

Power Grid is one of the greatest modern achievement. It is impossible to deny the center role of Electricity in our modern world and for poor communities in the world to get access to a minimum quality of life. For long, the development of Grid System infrastructure has been the only way to make Electricity available to all. But things evolve, now the availability of Electricity in our live can be assured at a reasonable cost by other means than the usual heavy investments in the expansion of the Grid System.

Denis Tremblay

Keynote

8:00 – 08:15 Wednesday, September 18, 2019

Montreal Conference Room – 11th Floor

AIEQ – Future direction

Denis Tremblay, President and CEO, AIEQ

Sponsor Panel

08:15 – 09:15 September 18, 2019

Montreal Conference Room – 11th Floor

Towards the energy system of the future

Faisal Kazi, President & CEO, Siemens Canada

Urban Strandberg, VP Sales & Marketing, ABB Grid & Power Quality, NA

John Camilleri, Manager Operation Technologies, PSC Consulting

Randy Berry, VP, Utilities Business Unit, Open Systems International

Moderator: Mike Bartel, VP Asset Management, AltaLink

Presentation summary

The global energy transition is under way and the field of electrical energy is changing. The energy system of the future will evolve to be smart and optimize all operations, from production facilities to customers and back. Digital transformation brings opportunities such as digital twin technology to achieve a sustainable future.

ABB Technical Tutorial

Thursday September 19, 2019 | 08:00 – 12:00, 8th Floor, Ramezay Room

Innovations and best practices for implementing your digital transformation strategy

Summary

ABB's latest technologies provide innovative solutions across the power value chain and help utilities to accelerate the digital transformation of power grids.

Traditional substations have always relied on copper cables to connect primary equipment like circuit breakers, conventional current and voltage transformers, and protection relays to control the electricity. Now, digital technologies with modern sensors, communications and standards are driving the evolution of something new—digital substations.

Digital substations are a key element of next-generation grids and recent innovations provide a vast list of benefits, including digital communications through fiber-optic cables replacing copper, which can maximize efficiency, reliability and safety, while reducing cost, risk and environmental impact.

Primary equipment's as integrated digital solution such as a digitally enabled power transformers, enable remote monitoring and data analytics of its vital parameters in real time. Connected via the digital substation back to the enterprise level with an enterprise asset management and performance software opens the door for seamless end to end integration and gives the operational and planning folks a crystal clear view allowing them to drive operation and planning more efficient as decision making can be linked to broad and real-time data.

The global experience in going the digital path from different utilities is shared as well the motivation and experience of implementing a digital substation in Canada will be presented.

Attend this session to learn how utilities are leveraging digital substations to improve safety and reliability while providing a functional consolidation to lower costs and optimize resources.

Additionally get an overview and better understanding of today's technology and innovations supporting the digital transformation.

Agenda

8:00 – 8:30 AM	Kal Allam Peter Rietmann	Introduction - Current challenges and how digital transformation helps (benefits) <ul style="list-style-type: none"> • Example of utilities challenges • Examples of applying digitalization • Brownfield vs Greenfield
8:30 - 10:00 AM	LucTousignant Peter Rietmann Jay Jayaraman Peter Rietmann	The digital building blocks (overview of current and future products) <ul style="list-style-type: none"> • Primary equipment / Digital Transformer • Protection and automation • Enterprise asset management solutions • Cybersecurity
10:00 - 10:30 AM		Coffee Break
10:30 - 11:00 AM	Varun Chhibbar	Digital Substation Experience - Implementation of Blackie Substation
11:00 – 12:00 PM	Robert Isbister Peter Rietmann Jay Jayarama	Panel discussion / ask the experts

Siemens Technical Tutorial

Thursday September 19, 2019 | 08:00 – 12:00, 8th Floor, Palais Room

The role of Distributed Energy Systems and Microgrids in the Energy Transition

Presenters: Alif Gilani, Head of Engineering, Digital Grid
 Bharat Solanki, Microgrid Protection Control Specialist

Summary

We are in the midst of an energy transition. A transition that is driven by the need to de-carbonize and increase sustainability, improve efficiency and enhance reliability and resilience.

Utilities and commercial and industrial (C&I) customers are turning to distributed energy systems (DES) as an answer for their power resource challenges. DES encompasses energy generation and storage close to the load, with both local and remote monitoring and control solution technologies. The maturity of distributed energy resources (DERs) and digitalization via automation and smart grid technology is at an intersecting point on their growth curve to trigger this transition.

Siemens has developed an interactive simulation allowing tutorial participants to take on various roles within the energy system. Stakeholders are required to plan and develop short-term and long-term strategies under real-life scenarios in order to meet sustainability, reliability, resiliency, and energy efficiency goals.

Distributed energy system solutions are quickly offering alternatives that can turn these challenges into opportunities to save costs, increase reliability, and reduce emissions. With a proven track record in business transformation and the industry's most comprehensive portfolio from generation all the way to consumption, Siemens Canada is your trusted partner helping you navigate the energy transition.

By attending this session, you will gain an understanding of how DERs can help utilities and customers navigate the challenges faced by the energy transition and take part in an interactive simulation focused on DES.

Agenda

8:00 – 9:00 AM	Overview of DES and Microgrids in the Energy Transition <ul style="list-style-type: none"> • Challenges currently facing utilities • Benefits of Distributed Energy Resources and Microgrids • Use Case Examples
9:00 - 9:40 AM	DES Simulation <ul style="list-style-type: none"> • Review of the objectives and goals of the session • Opening round – assessment of stakeholder roles
9:40 - 10:10 AM	Simulation Round 1 <ul style="list-style-type: none"> • Asset Acquisition • Scenario One presentation • Assessment of impact on stakeholders
10:10 - 10:30 AM	Coffee Break
10:30 - 11:00 AM	Simulation Round 2 <ul style="list-style-type: none"> • Asset Acquisition • Scenario Two presentation • Assessment of impact on stakeholders
11:00 - 11:30 AM	Simulation Round 3 <ul style="list-style-type: none"> • Asset Acquisition • Scenario #1 presentation • Assessment of impact on stakeholders
11:30 – 12:00 PM	Recap & Open Discussion

TECHNICAL SESSIONS

Tuesday September 17, 2019

Session 1
11th floor
Room Montreal

(10:30 – 10:45)

Transformers (A2)

Session chairs: Patrick Picher, Hydro-Québec - IREQ

CIGRE-106

- ☒ Generator Failure Forensic Simulations Study, Lessons Learned
Hesamaldin (Sam) Maleki, Dan Kell, Iftikhar Khan, Myles Godfrey
Hatch Ltd. (Canada)

CIGRE-133

(10:45 – 11:00)

- ☒ [FR] Évaluation d'état diélectrique et Analyse des causes profondes des défaillances des transformateurs de courant HT et THT
☒ [EN] HV and EHV Current Transformer dielectric condition assessment and root cause analysis
Diego M. Robalino¹, Ismail Güner²
¹Megger (USA), ²Hydro-Québec

CIGRE-117

(11:00 – 11:15)

- ☒ Analysis of Short Circuit Withstand Capability of Power Transformers

I. LAZARIEV

JSC Ukrainian research, design and technological transformer institute (JSC "VIT") (Ukraine)

CIGRE-198

(11:15 – 11:30)

- ☒ [FR] Étude de cas d'analyse de la réponse en fréquence (FRA) pour l'évaluation de l'intégrité d'un transformateur usagé suite à une réparation

☒ [EN] Case study for assessing the integrity of a service-aged transformer repair using Frequency Response Analysis (FRA)

R. S. A. FERREIRA¹, H. SIMARD², P. PICHER³, V. BEHJAT¹, I. FOFANA¹, H. EZZAIDI¹

¹Research Chair on Aging Power Network Infrastructure (ViAHT), Université du Québec à Chicoutimi (UQAC) (Canada),

²Énergie Électrique Rio Tinto, Saguenay-Lac-Saint-Jean, ³Institut de recherche d'Hydro-Québec (IREQ)

CIGRE-209

(11:30 – 11:45)

- ☒ Web Applications for Transmission System Asset Health Monitoring

Sunil Agarwal, P.K Srivastava, Sunil Kumar, Manoj Kumar, Abhishek Bhardwaj, Vikas Bishnoi

Power Grid Corporation of India Limited (India)

CIGRE-160

(11:45 – 12:00)

- ☒ [FR] Surveillance de l'état du système de refroidissement des transformateurs par l'utilisation de réseaux de neurones

☒ [EN] Transformer cooling system monitoring using neural networks

A. ZINFLOU, P. PICHER, L. VOULIGNY, A. MARCHAND

Hydro-Québec (Canada)

Session 2
9th floor
Room Ville-Marie

(10:30 – 10:45)

HVDC and Power Electronics (B4)

Session chairs: Antoine Manga, Claude Rajotte, Hydro-Québec

CIGRE-180

(10:45 – 11:00)

- ☒ Increasing Transient Stability Limit by Nonlinear Damping Design

Jinpeng Guo, Haihao Jiang, Xiaozhe Wang, Boon-teck Ooi

McGill University (Canada)

CIGRE-183

(10:45 – 11:00)

- ☒ The Research on the Key Equipment for 750kV Fixed Series Compensation in 3000m a.s.l.

CHEN Yuanjun, ZHOU Qiwen, WANG Dechang, Gao Jian, Chen Wei, Zhang Daoxiong

NR Electric Co., Ltd. (China)

Tuesday September 17, 2019

(11:00 – 11:15)

CIGRE-208

Voltage Source Converter (VSC) Operation at DC Lines close to AC Lines

M. Weiland, E. Starschich, G. Ebner, R. Teixeira Pinto, M. Schmidt
Siemens AG (Germany)

(11:15 – 11:30)

CIGRE-261

Influence of extreme low humidity on the dielectric strength of air insulation under critical design voltages

L. Arevalo¹, D. Wu¹, O. Diaz¹, M. Larsson², C. Tornkvist²

¹ABB Power Grids – HVDC (Sweden), ²ABB Corporate Research

(11:30 – 11:45)

CIGRE-142

Sizing Study for a Hybrid Power Flow Controller – Comparison with the Nanjing UPFC

J. Z. Bebic¹, Y. Dong², L. Pan², B. Wang³

¹Hybrid Power Flow Controller Ltd. (Canada), ²Research Institute of NR Electric Co., Ltd., ³NR Electric USA LLC

(11:45 – 12:00)

CIGRE-144

MULTI -FPGA SOLUTION FOR LARGE POWER SYSTEMS AND MICROGRIDS REAL TIME SIMULATION

TEJKIRAN RANGINEEDI, SYED QASEEM Ali, AMINE YAMANE, LUC-ANDRE GREGOIRE, JEAN-NICOLAS PAQUIN, JEAN BELANGER
OPAL-RT Technologies (Canada)

**Session 3
9th floor**

Room St-Antoine

(10:30 – 10:45)

Distribution Systems and Dispersed Generation (C6)

Session chairs: Pierre Couture, Annissa Heniche Oussedik, Hydro-Québec - IREQ

CIGRE-195

A DER Management System for Distributing Power among Discretely and Continuously Controlled Devices within DER group

Chu Sun¹, Syed Qaseem Ali², Geza Joos¹, Francois Bouffard¹

¹McGill University (Canada), ²OPAL-RT Technologies

(10:45 – 11:00)

CIGRE-202

The Energy Twin – A Solution for Techno-Economic Business Case Analysis of Microgrids & Distributed Energy Systems (DES)

Bharatkumar Solanki, Alif Gilani

Siemens Canada Limited (Canada)

(11:00 – 11:15)

CIGRE-228

Synchronous Generator Load Sharing Models for Diesel-Based Remote Systems

JASON A. ZRUM, MICHAEL ROSS

Yukon Research Centre – Yukon College (Canada)

(11:15 – 11:30)

CIGRE-230

MiGen Project – Empowering the transformation at the grid edge

R. Abdullah¹, M. Lacroix²

¹Hydro Ottawa (Canada), ²eMcREY Solutions

(11:30 – 11:45)

CIGRE-239

Impact of Load Modelling Parameters on Motor Start simulation in The Alberta Electric System

Ping-Kwan Keung¹, Sabbir Ahmed¹, Hamid Zareipour², Ali Reza Seifi², Edmond Chih², Amir Saman Hoshayrzaadeh²

¹Alberta Electric System Operator (AESO) (Canada), ²University of Calgary

(11:45 – 12:00)

CIGRE-161

Determination of Hot Spots in Gas Generators Using Brillouin Based Fiber Optic Distributed Sensor

L. ZOU¹, O. SEZERMAN¹, C. SPENCER², G. DAILEY³

¹OZ Optics Limited (Canada), ²Calpine Corporation, ³QPS Photonics Inc

Tuesday September 17, 2019

Session 4
11th floor
Room Montreal
 (13:15 – 13:30)

Overhead Lines (B2)
Session chairs: Simon Prud'homme, Maryse Lavoie, Hydro-Québec

CIGRE-187

- ☒ Design optimization of a 138 kV transmission line with optical phase conductors
 RICHARD MARANDA, GUILLAUME VACHON, BASSEM KAABIA
 BBA Inc. (Canada)

(13:30 – 13:45)

CIGRE-194

- ☒ [FR] Amélioration de la durée de vie en fatigue du conducteur en utilisant une pince de suspension avec des élastomères coniques
 ☒ [EN] Improved conductor endurance limit by using a suspension clamp with conical elastomers
 J. PARADIS, P. VAN DYKE
 Institut de Recherche d'Hydro-Québec (Canada)

(13:45 – 14:00)

CIGRE-114

- ☒ Management Insulator contamination problems, mitigation methods and innovative predictive maintenance of overhead lines.
 JM GEORGE
 Sediver (France)

(14:00 – 14:15)

CIGRE-199

- ☒ Transmission Line Route Refinement with Simultaneous Geomorphological Assessment
 Sébastien Paradis, Line Bariteau, Claude Roy
 BBA Inc. (Canada)

(14:15 – 14:30)

CIGRE-232

- ☒ [FR] Validation d'un conducteur AACSR avec fils trapézoïdaux pour une traversée de rivière
 ☒ [EN] Validation of an AACSR conductor with trapezoidal wires for a river crossing
 P. VAN DYKE¹, S. PRUD'HOMME², J. PARADIS¹
¹Institut de Recherche d'Hydro-Québec (Canada), ²Hydro-Québec

Session 5
9th floor
Room Ville-Marie
 (13:15 – 13:30)

Protection and Automation (B5)

Session chairs: Annissa Heniche Oussedik, Patrick Picher, Hydro-Québec - IREQ

CIGRE-193

- ☒ New Methodologies for Accurate Modelling and Simulation of Advanced Telecommunication-Based Protection Schemes in a Software Environment
 Hadi Khani, Daniyal Qureshi, Saman Alaeddini, Ishwarjot Anand
 Quanta Technology (Canada)

(13:30 – 13:45)

CIGRE-105

- ☒ A Station Domain Islanding Detection Method Based on Topology Analysis
 Hua Xiujuan, Jiang Miao, Xu Guangfu
 NR Electric Co., Ltd. (China)

(13:45 – 14:00)

CIGRE-104

- ☒ AI-Based Islanding Detection for Utilities and Industrials
 K. BAVISETTI¹, D. CRUDELE², J. FRANKLIN³, S. GILL¹, M. JENSEN⁴, K. VU¹
¹ABB (USA), ²NYSERDA, ³National Grid, ⁴PG&E

(14:00 – 14:15)

CIGRE-108

- ☒ The Identification of Transmission Line Overload and Fault Based on Ucosφ
 Wang xinggao¹, Zhou Zexin¹, Liu Huanzhang², Du dingxiang¹
¹China Electric Power Research Institute (China), ²Central China Grid Company Limited

(14:15 – 14:30)

CIGRE-244

- ☒ The AURORA vulnerability: The sword of Damocles over the heads of rotating machines
 Marc Potvin
 BBA Inc. (Canada)

Tuesday September 17, 2019

Session 6

9th floor

Room St-Antoine

(13:15 – 13:30)

Electricity Markets and Regulation (C5)

Session chairs: Alex Cruckshank, chairman SC C5

CIGRE-135

■ The fundamental evaluation of the methodology of constrained connection for Distributed Generation for procuring flexibility in European countries –lessons for Japan-

K. Furusawa
 Central Research Institute of Electric Power Industry (Japan)

(13:30 – 13:45)

CIGRE-140

■ Generation Connection Process - North American vs Australian Experience

M. HEIDARI, J. JIANG, J. TAILOR, T. ABDEL-GALIL
 SNC Lavalin Inc (Canada)

(13:45 – 14:00)

CIGRE-186

■ Challenges Faced and Measures Adopted for RE Integration in Indian Power system

P.K. Agarwal, S.K. Jain
 Power System Operation Corporation Ltd. (India)

(14:00 – 14:15)

CIGRE-217

■ Energy Storage and Ancillary Services Markets in North America

Hisham Alharbi, Kankar Bhattacharya
 University of Waterloo (Canada)

(14:15 – 14:30)

CIGRE-240

■ Demand Response Services in Electricity Markets of US and Canada

NITIN PADMANABHAN¹, MOHAMED AHMED², KANKAR BHATTACHARYA¹

¹ECE Department, University of Waterloo (Canada), ²Independent Electricity System Operator

Session 7

11th floor

Room Montreal

(15:00 – 15:15)

High Voltage Equipment (A3)

Session chairs: Maryse Lavoie, Hydro-Québec, Masoud Farzaneh, Consultant

CIGRE-112

■ [FR] Réseau de transport électrique intelligent formé de lignes de transport intelligentes et d'un réseau indépendant et redondant de fibres optiques

■ [EN] Smart Transmission Grid Based on Smart Power Lines with Independent and Redundant Optical Fiber Network

Pierre Couture
 Hydro-Québec (Canada)

(15:15 – 15:30)

CIGRE-175

■ A Station Service Voltage Transformer Designed and Tested to Withstand a Severe Internal Arc Fault

S. Brodeur¹, H. Dinh²

¹ABB Inc., Transformers (Canada), ²ABB Inc., High Voltage Products

(15:30 – 15:45)

CIGRE-201

■ Mitigation of inrush and outrush currents in capacitor bank switching using dry type air core reactors

M. Goulkah D. Caverly, M. Sharp
 Trench Ltd (Canada)

(15:45 – 16:00)

CIGRE-231

■ [FR] Fabrication de revêtements superhydrophobes durables pour les isolateurs en verre

■ [EN] Fabrication of a durable superhydrophobic coating for high voltage glass insulators

A. Allahdini, G. Momen, R. Jafari
 Université du Québec à Chicoutimi (Canada)

Tuesday September 17, 2019

(16:00 – 16:15)

CIGRE-248

■ Connecting Controlled Switching Devices in Power Plants to Analytics Tools in Sorgenia's Operations Centre to Increase the Service Life of Apparatuses

 V. BALVET¹, V. CHECOLA²
¹VIZIMAX Inc. (Canada), ²SORGENIA S.p.A.

Session 8
9th floor
Room Ville-Marie

(15:00 – 15:15)

HVDC and Power Electronics (B4)
Session chairs: Patrick Picher, Alain Côté, Hydro-Québec - IREQ
CIGRE-213

■ Active Filtering of harmonic voltages or currents utilizing a MMC STATCOM-Design Aspects and Performance Experience

T. Schlegl, Dr. G. Pilz

Siemens AG (Germany)

(15:15 – 15:30)

CIGRE-223

■ HVDC O&M Strategy

 D. KAVANAGH¹, C. MADSEN², D. KELL³
¹Nalcor Energy (Canada), ²ATCO Electricity Global Business Unit, ³Hatch

(15:30 – 15:45)

CIGRE-225

■ Research on Key Technical Parameters of Main Equipments for UHV Converter Station in High Altitude Area

Zhang He, Wu Fangjie, Shen Xiaolin, Yue Bo, Yang yiming, Wang yaoxuan

State Grid Economic and Technological Research Institute Co., Ltd. (China)

(15:45 – 16:00)

CIGRE-227

■ A COORDINATION CONTROL BETWEEN SVC AND BUS/SHUNT REACTORS

LOKESH CHUNDAWAT, ALOK SHARMA

Power Grid Corporation of India Ltd (India)

(16:00 – 16:15)

CIGRE-189

■ Method for Suppressing Current Spike in Wide Input Flyback converter

 XIAO Yuwei¹, LIU Xuandong¹, SUN Wei², WU Bin¹
¹School of Electrical Engineering, Xi'an Jiaotong University (China), ²Wuyi University

Session 9
9th floor
Room St-Antoine

(15:00 – 15:15)

Protection and Automation (B5)
Session chairs: Antoine Manga, Claude Rajotte, Hydro-Québec
CIGRE-101

■ Study of Distributed Grounding Line Selection Application Based on GOOSE

Jiang Miao, Shi Yong, Dong Kaida, Hou Wei, Li Yuqi

NR Electric Co., Ltd. (China)

(15:15 – 15:30)

CIGRE-181

■ Real-Time Dynamic Protection Zone Determination for Interconnected Power Systems using Network Theory Principles

 A.C. ADEWOLE¹, A.D. RAJAPAKSE¹, D. OUELLETTE², P. FORSYTH²
¹University of Manitoba (Canada), ²RTDS Technologies Inc.

(15:30 – 15:45)

CIGRE-129

■ Shunt Reactor with Auxiliary Winding System Inter-turn Protection Based on Zero Sequence Differential Current

 GUO Yarong¹, WANG Xingguo¹, LIU Huanzhang², LIU Dan³
¹State Key Laboratory of Power Grid Safety and Energy Conservation (China Electric Power Research Institute) (China)

²Central China Grid Company, ³China National Electric Power Dispatch and Control Center

(15:45 – 16:00)

CIGRE-197

■ Con Edison Transmission System Reliability Model

 R. Hasan¹, M. Viele¹, D. J. Allen²
¹Con Edison (USA), ²The Risk Research Group

Tuesday September 17, 2019

(16:00 – 16:15)

CIGRE-242

☒ **Comprehensive Motor Condition Monitoring Integrated in Advanced Protection Relays – A real case study**

Umar Khan¹, Mital Kanabar¹, Mathieu Harvey², Carlos Oliveira³

¹GE Renewable Energy (Canada), ²Arcelor Mittal Mines, ³Trelec Inc.

Session 10
11th floor
Room Montreal

(16:45 – 17:00)

Substations (B3)

Session chairs: Dragan Komljenovic, Jean-François Boudreau, Hydro-Québec – IREQ

CIGRE-138

☒ [FR] Prise de décisions en gestion des actifs des utilités électriques en tenant compte des risques

☒ [EN] Risk-Informed Decision-Making in Asset Management of Electrical Utilities

Dragan Komljenovic¹, Darragi Messaoudi², Pierre Larivière², Steve Caron², Ramzi Chahine²

¹IREQ (Canada), ²Hydro-Québec TransÉnergie

(17:00 – 17:15)

CIGRE-185

☒ Recognition of the benefits by the use of Transformers and Reactors immersed in insulating fluid with high fire point (K Class): the case of Fire Department of São Paulo state in Brazil

ROBERTO IGNACIO DA SILVA, ALEXANDRE COELHO

Cargill (Brazil)

(17:15 – 17:30)

CIGRE-190

☒ [FR] Évolution numérique des systèmes de commande et de protection d'un poste électrique conformément à la norme 61850 ; Retour d'expérience d'un projet pilote ayant été pré-validé sur réplique avant son installation

Saurabh Talwar¹, Eric Loiselle², David Lambert², William Boutin², Michel Lavallee², Felipe Sarubbi¹

¹Siemens Canada Limited (Canada), ²Hydro-Québec

(17:30 – 17:45)

CIGRE-158

☒ Early Fault Detection on Energized Substation Equipment

C. JEAN, R. WEISER

Positron Inc. (Canada)

Session 11
9th floor
Room Ville-Marie

(16:45 – 17:00)

Transformers (A2)

Session chairs: Mariela Rodriguez, Hydro-Québec – IREQ

CIGRE-157

☒ Bypassing GSU transformers in case of emergencies or maintenance

E. GOMEZ HENNIG¹, K. KAINEDER², R. MAYER², E. SCHWEIGER³

¹Siemens Canada Ltd. (Canada), ²Siemens AG (Austria), ³Siemens AG (Germany)

(17:00 – 17:15)

CIGRE-219

☒ Use of GIS Tools and Space Technologies for Optimal Transmission Line Routing and Asset Mapping

B. N. De. Bhowmick, V. K. Bhaskar, S. B. R. Rao, Pradeep Patil, Pradeep Singh Chauhan, Shalini Raj

Power Grid Corporation of India Limited (India)

(17:15 – 17:30)

CIGRE-166

☒ Improved Jiles-Atherton Hysteresis Model for Converter Transformer Controlled Switching Assessment in Nelson River Bipole III HVDC System

C. Fang¹, A. D. Rajapakse², R. Jayasinghe³

¹Manitoba Hydro (Canada), ²University of Manitoba, ³Manitoba Hydro International

(17:30 – 17:45)

CIGRE-167

☒ Development of transmission voltage class, reconnectable 230 x 115 kV mobile transformers for improved reliability of power delivery

T. KALICKI¹, W. ZIOMEK², K. VIJAYAN²

¹Hydro One Inc. (Canada), ²PTI Transformers LP

Tuesday September 17, 2019

Session 12

 9th floor

Room St-Antoine

(16:45 – 17:00)

System Operation and Control (C2)
Session chairs: Pierre Couture, Atieh Delavari, Hydro-Québec – IREQ
CIGRE-111
■ Power System Stabilizer Tuning with Presence of Torsional Oscillations

 A. MOSHREF¹, H. TAGOURTI¹, N. WOOSTER¹, R. HARRISON², T. RICCIOPPO²
¹BBA Engineering Ltd. (Canada), ²ATCO

(17:00 – 17:15)

CIGRE-118
■ Simulation and Analysis of Resilient Power Systems in PJM

N. TACKA, A. GIACOMONI, S. BENNER, R. HILDERBRAND

PJM Interconnection (USA)

(17:15 – 17:30)

CIGRE-146
■ Normalised Voltage Instability Sensitivity Index: A New Concept for Monitoring Voltage Stability in the Control Centre

 V.N. SEWDIEN¹, R. PREECE², J.L. RUEDA TORRES³
¹TenneT TSO B.V. (Netherlands), ²The University of Manchester, ³TU Delft

(17:30 – 17:45)

CIGRE-249
■ PV Solar Farm Control as STATCOM (PV-STATCOM) for Alleviating Subsynchronous Oscillations

R. Salehi, R. K. Varma

The University of Western Ontario (Canada)

Wednesday September 18, 2019

Session 13
11th floor
Room Montreal
(9:45 – 10:00)

Transformers (A2)
Session chairs: Claude Rajotte, Hydro-Québec, Champlain Landry, Hydro-Québec – IREQ

CIGRE-148

- The Value of Performing Power Factor Sweep Measurements on Bushings
BRANDON DUPUIS, LOGAN MERRILL
OMICRON electronics Corp. (USA)

(10:00 – 10:15)

CIGRE-120

- Torsion of Transformer Windings Under Short Circuit
I. LAZARIEV
JSC Ukrainian research, design and technological transformer institute (JSC "VIT") (Ukraine)

(10:15 – 10:30)

CIGRE-134

- [FR] Méthodologie d'évaluation d'état des transformateurs de puissance
■ [EN] Condition Assessment Methodology for Power Transformers
Brian Sparling¹, Ismail Güner²
¹Dynamic Ratings (Canada), ²Hydro-Québec

(10:30 – 10:45)

CIGRE-229

- [FR] Étude préliminaire de fluide à base d'ester pour application dans des transformateurs exploités en région climatique froide
■ [EN] Preliminary Study of Ester-based Fluid for Application in Transformers Serving in Cold Climatic Regions
U. Mohan Rao¹, I. Fofana¹, T. Jaya¹, E. M. Rodriguez Celis², J. Jalbert², B. Noirhomme², P. Picher²

Wednesday September 18, 2019

Session 19
11th floor
Room Montreal
(13:45 – 14:00)

System Development and Economics (C1)
Session chairs: Claude Rajotte, Hydro-Québec, Martin de Montigny, Hydro-Québec - IREQ

CIGRE-151

- ☒ Reactive Power Planning Strategy for the BC Hydro Transmission System
YANSONG LENG, PAUL HORAN, MING ZOU, WAH SHUM
BC Hydro (Canada)

(14:00 – 14:15)

CIGRE-176

- ☒ [FR] Élaboration d'un système d'aide à la décision pour la gestion des actifs à TransÉnergie
☒ [EN] Development of a decision support system for asset management at TransÉnergie
A. Côté, D. Messaoudi, D. Komljenovic, S. Alarie, O. Blancke, J.-F. Boudreau, M. Gaha, E. Truchon, S. Pelletier
Hydro-Québec (Canada)

(14:15 – 14:30)

CIGRE-238

- ☒ Effects of Future Uncertainty on Present-day Asset Management
K. MARTIN-STURMEY, A. ALFALAHI, A. BAKULEV
METSCO Energy Solutions (Canada)

(14:30 – 14:45)

CIGRE-168

- ☒ Implementation Experience of URTDSM Project in Indian Power System
P.K. Agarwal, Rajkumar Anumasula, Chandan Kumar
Power System Operation Corporation Limited (India)

(14:45 – 15:00)

CIGRE-236

- ☒ Optimal Energy Management and Storage Sizing for Electric Vehicles
A. DESHPANDE, J. TAYLOR
University of Toronto (Canada)

Session 20
9th floor
Room Ville-Marie
(13:45 – 14:00)

Overhead Lines (B2)

Session chairs: Josée Paradis, Maryse Lavoie, Hydro-Québec - IREQ

CIGRE-220

- ☒ Transformation of a Large Diameter Monopole to a Pinned Support Guyed Tower
Pierre-Luc Massé, Richard Maranda, Alireza Aboutalebi
BBA Inc. (Canada)

(14:00 – 14:15)

CIGRE-113

- ☒ Condition Assessment and Reliability Analysis of Porcelain and Toughened Glass Cap and Pin Insulators
C. BONILLA, H. LI
Powertech Labs. Inc. (Canada)

(14:15 – 14:30)

CIGRE-214

- ☒ Steel foundations design optimization of a 138 kV transmission line
MAXIME SANSFAÇON¹, RICHARD MARANDA², GUILLAUME VACHON²
¹EMS Ingénierie (Canada), ²BBA Inc.

(14:30 – 14:45)

CIGRE-235

- ☒ Line Rating Optimisation with Numerical Weather Models: the ALiRA Project
R. SUNDERLAND, G. LILJEBAKK, J. PARR, D.J. CANNON, F.G. BRAGLIA
Digital Engineering Ltd (United Kingdom)

(14:45 – 15:00)

CIGRE-203

- ☒ Field Validation of Various Line Rating Methods on a 138 kV Transmission Line in British Columbia
M. L. Lu, C. Singh, R. Barone, K. Zhang, M. Guite, D. Chakrabarti
BC Hydro Power & Authority (Canada)

Wednesday September 18, 2019

Session 21

11th floor

Room Montreal

(15:30 – 15:45)

Protection and Automation (B5)

Session chairs: Annissa Heniche Oussedik, Martin de Montigny, Hydro-Québec - IREQ

CIGRE-139

☒ [FR] Unité Mobile : une nouvelle approche de remplacement d'un système de commande et protection dans une installation existante

☒ [EN] Mobile unit: A new approach to modernize the protection and control systems in an existing substation

J-S LABBÉE

Hydro-Québec (Canada)

(15:45 – 16:00)

CIGRE-159

☒ Implementation and Testing of a Flicker Meter Using IEC 61850-9-2 Sampled Values

J. WIJEKOON¹, A.D. RAJAPAKSE¹, N. PERERA², C. ADEWOLE¹

¹University of Manitoba (Canada), ²ERLPhase Power Technologies Ltd

(16:00 – 16:15)

CIGRE-178

☒ Secured Substation Protection & Automation IED Firmware Management

ANCA CIORACA, MITAL KANABAR

GE Grid Solutions (Canada)

(16:15 – 16:30)

CIGRE-128

☒ Research and Application of Protection Principle of 300Mvar Class New Synchronous Condenser

Yaoyao Ji, Huimin Wang, Guang Wang, Zigang Guo, Kai Wang, Jun Chen

NR Electric Co., Ltd. (China)

Session 22

9th floor

Room Ville-Marie

(15:30 – 15:45)

Transformers (A2)

Session chairs: Marie-Claude Lessard, Champlain Landry, Hydro-Québec - IREQ

CIGRE-177

☒ Assessing Water Content and Vibration from Dynamic Measurement in Transformer

S. Akré¹, V. Behjat¹, P. Kung², I. Fofana¹

¹Research Chair on the Aging of Power Network Infrastructure (ViAHT), UQAC (Canada), ²QPS Photonics

(15:45 – 16:00)

CIGRE-184

☒ Ten Years of Experience with Natural Ester Dielectric Fluid in 245 kV: Shunt Reactor of Vilhena Substation - Eletronorte

ROBERTO IGNACIO DA SILVA¹, IRAN PRADO ARANTES², ITO CAPINOS³, LUCAS DE OLIVEIRA¹, MAURÍCIO A. DE LIMA², GERALDO L. NICOLA⁴

¹Cargill (Brazil), ²Eletronorte, ³GE, ⁴Consultant

(16:00 – 16:15)

CIGRE-191

☒ Converter Transformer Cold Starts: Specification Nuances and Operational Impacts

C. MADSEN¹, B. KORBUTIAK¹, L. BENOIT¹, L. NEUMANN¹, M. MIELKE¹, T. THOMPSON², K. WALKER³

¹ATCO Electricity Global Business Unit (Canada), ²Nalcor Energy, ³Hatch

(16:15 – 16:30)

CIGRE-221

☒ Magnetic and Thermal Impact of GIC on Power Transformers: A Case Study

TR. Girgis¹, M. Saad², E. teNyenhuis², C. Clark³

¹ABB Inc. (USA), ²ABB Inc. (Canada), ³Altalink (Canada)

LIST OF PAPERS [IN NUMERICAL ORDER]

CIGRE-101

 **Study of Distributed Grounding Line Selection Application Based on GOOSE**
Jiang Miao, Shi Yong, Dong Kaida, Hou Wei, Li Yuqi
NR Electric Co., Ltd. (China)

CIGRE-102

 **System-Based Technique to Evaluate the Risk of Self-Excitation of Synchronous Machines**
Sameh K. Kodsi, Thiromi Rajapakse, Jun Tan
Teshmont Consultants LP (Canada)

CIGRE-104

 **AI-Based Islanding Detection for Utilities and Industrials**
K. BAVISETTI¹, D. CRUDELE², J. FRANKLIN³, S. GILL¹,
M. JENSEN⁴, K. VU¹
¹ABB (USA)
²NYSERDA
³National Grid
⁴PG&E

CIGRE-105

 **A Station Domain Islanding Detection Method Based on Topology Analysis**
Hua Xiujuan, Jiang Miao, Xu Guangfu
NR Electric Co., Ltd. (China)

CIGRE-106

 **Generator Failure Forensic Simulations Study, Lessons Learned**
Hesamaldin (Sam) Maleki, Dan Kell, Iftikhar Khan, Myles Godfrey
Hatch Ltd. (Canada)

CIGRE-108

 **The Identification of Transmission Line Overload and Fault Based on Ucosφ**
Wang xingguo¹, Zhou Zexin¹, Liu Huanzhang², Du dingxiang¹
¹China Electric Power Research Institute (China)
²Central China Grid Company Limited

CIGRE-111

 **Power System Stabilizer Tuning with Presence of Torsional Oscillations**
A. MOSHREF¹, H. TAGOURTI¹, N. WOOSTER¹, R. HARRISON²,
T. RICCIOPPO²
¹BBA Engineering Ltd. (Canada)
²ATCO

CIGRE-112

 **[FR] Réseau de transport électrique intelligent formé de lignes de transport intelligentes et d'un réseau indépendant et redondant de fibres optiques**
 **[EN] Smart Transmission Grid Based on Smart Power Lines with Independent and Redundant Optical Fiber Network**
Pierre Couture
Hydro-Québec (Canada)

CIGRE-113

 **Condition Assessment and Reliability Analysis of Porcelain and Toughened Glass Cap and Pin Insulators**
C. BONILLA, H. LI
Powertech Labs. Inc. (Canada)

CIGRE-114

 **Management Insulator contamination problems, mitigation methods and innovative predictive maintenance of overhead lines.**
JM GEORGE
Sediver (France)

CIGRE-116

 **The Design of Control and Protection System of 150 MVar SVC in Nuevo Vallarta Substation in Mexico**
Xin Huang, DaoXiong Zhang, Chihuan Chen, Haiying Li, Qiwen Zhou, Gang Du
NR Electric Co., Ltd. (China)

CIGRE-117

 **Analysis of Short Circuit Withstand Capability of Power Transformers**
I. LAZARIEV
JSC Ukrainian research, design and technological transformer institute (JSC "VIT") (Ukraine)

CIGRE-118

 **Simulation and Analysis of Resilient Power Systems in PJM**
N. TACKA, A. GIACOMONI, S. BENNER, R. HILDERBRAND
PJM Interconnection (USA)

CIGRE-120

 **Torsion of Transformer Windings Under Short Circuit**
I. LAZARIEV
JSC Ukrainian research, design and technological transformer institute (JSC "VIT") (Ukraine)

CIGRE-122

 **A Simplified Practical Relation of Tap-Changer Control Mode Upon HVDC Valve Power Loss and its Engineering Application**
Zhongyuan Zhao, Bin Wang
NR Electric Company Ltd. (China)

CIGRE-128

 **Research and Application of Protection Principle of 300Mvar Class New Synchronous Condenser**
Yaoyao Ji, Huimin Wang, Guang Wang, Zigang Guo, Kai Wang, Jun Chen
NR Electric Co., Ltd. (China)

CIGRE-129

Shunt Reactor with Auxiliary Winding System Inter-turn Protection Based on Zero Sequence Differential Current
 GUO Yarong¹, WANG Xingguo¹, LIU Huanzhang², LIU Dan³
¹State Key Laboratory of Power Grid Safety and Energy Conservation (China Electric Power Research Institute) (China)
²Central China Grid Company
³China National Electric Power Dispatch and Control Center

CIGRE-133

[FR] Évaluation d'état diélectrique et Analyse des causes profondes des défaillances des transformateurs de courant HT et THT
[EN] HV and EHV Current Transformer dielectric condition assessment and root cause analysis
 Diego M. Robalino¹, Ismail Güner²
¹Megger (USA)
²Hydro-Québec

CIGRE-134

[FR] Méthodologie d'évaluation d'état des transformateurs de puissance
[EN] Condition Assessment Methodology for Power Transformers
 Brian Sparling¹, Ismail Güner²
¹Dynamic Ratings (Canada)
²Hydro-Québec

CIGRE-135

The fundamental evaluation of the methodology of constrained connection for Distributed Generation for procuring flexibility in European countries –lessons for Japan-
 K. Furusawa
 Central Research Institute of Electric Power Industry (Japan)

CIGRE-137

[FR] Améliorations aux protections des filtres c.a. des convertisseurs CCHT en utilisant un calcul d'impédance
[EN] Upgrade to HVDC AC Filters Protections – Using Impedance Calculation
 P.-A. Chiasson, S. Tremblay
 Hydro-Québec (Canada)

CIGRE-138

[FR] Prise de décisions en gestion des actifs des utilités électriques en tenant compte des risques
[EN] Risk-Informed Decision-Making in Asset Management of Electrical Utilities
 Dragan Komljenovic¹, Darragi Messaoudi², Pierre Larivière², Steve Caron², Ramzi Chahine²
¹IREQ (Canada)
²Hydro-Québec TransÉnergie

CIGRE-139

[FR] Unité Mobile : une nouvelle approche de remplacement d'un système de commande et protection dans une installation existante
[EN] Mobile unit: A new approach to modernize the protection and control systems in an existing substation
 J-S LABBÉE
 Hydro-Québec (Canada)

CIGRE-140

Generation Connection Process - North American vs Australian Experience
 M. HEIDARI, J. JIANG, J. TAILOR, T. ABDEL-GALIL
 SNC Lavalin Inc (Canada)

CIGRE-142

Sizing Study for a Hybrid Power Flow Controller – Comparison with the Nanjing UPFC
 J. Z. Bebic¹, Y. Dong², L. Pan², B. Wang³
¹Hybrid Power Flow Controller Ltd. (Canada)
²Research Institute of NR Electric Co., Ltd.
³NR Electric USA LLC

CIGRE-144

MULTI -FPGA SOLUTION FOR LARGE POWER SYSTEMS AND MICROGRIDS REAL TIME SIMULATION
 TEJKIRAN RANGINEEDI, SYED QASEEM Ali, AMINE YAMANE, LUC-ANDRE GREGOIRE, JEAN-NICOLAS PAQUIN, JEAN BELANGER
 OPAL-RT Technologies (Canada)

CIGRE-146

Normalised Voltage Instability Sensitivity Index: A New Concept for Monitoring Voltage Stability in the Control Centre
 V.N. SEWDIEN¹, R. PREECE², J.L. RUEDA TORRES³
¹Tennet TSO B.V. (Netherlands)
²The University of Manchester
³TU Delft

CIGRE-148

The Value of Performing Power Factor Sweep Measurements on Bushings
 BRANDON DUPUIS, LOGAN MERRILL
 OMICRON electronics Corp. (USA)

CIGRE-151

Reactive Power Planning Strategy for the BC Hydro Transmission System
 YANSONG LENG, PAUL HORAN, MING ZOU, WAH SHUM
 BC Hydro (Canada)

CIGRE-152

Reliability and Cost-Effectiveness Analysis of Various HV Substation Configurations
 A Boričić, D Bhatt, P Westerlund
 KTH Royal Institute of Technology (Sweden)

CIGRE-153

Harmonic Resonance phenomena in lightly loaded MV network
 Mohammed Bin Jarsh¹, Surendra S. Chhajta², Jayaraj Peter Prasad²
¹Department of Energy (United Arab Emirates)
²Abu Dhabi Transmission and Despatch Company (TRANSCO)

CIGRE-157

 **Bypassing GSU transformers in case of emergencies or maintenance**

E. GOMEZ HENNIG¹, K. KAINEDER², R. MAYER²,

E. SCHWEIGER³

¹Siemens Canada Ltd. (Canada)

²Siemens AG (Austria)

³Siemens AG (Germany)

CIGRE-158

 **Early Fault Detection on Energized Substation Equipment**

C. JEAN, R. WEISER

Positron Inc. (Canada)

CIGRE-159

 **Implementation and Testing of a Flicker Meter Using IEC 61850-9-2 Sampled Values**

J. WIJEKOON¹, A.D. RAJAPAKSE¹, N. PERERA², C. ADEWOLE¹

¹University of Manitoba (Canada)

²ERLPhase Power Technologies Ltd

CIGRE-160

 **[FR] Surveillance de l'état du système de refroidissement des transformateurs par l'utilisation de réseaux de neurones**

 **[EN] Transformer cooling system monitoring using neural networks**

A. ZINFLOU, P. PICHER, L. VOULIGNY, A. MARCHAND

Hydro-Québec (Canada)

CIGRE-161

 **Determination of Hot Spots in Gas Generators Using Brilouin Based Fiber Optic Distributed Sensor**

L. ZOU¹, O. SEZERMAN¹, C. SPENCER², G. DAILEY³

¹OZ Optics Limited (Canada)

²Calpine Corporation

³QPS Photonics Inc

CIGRE-163

 **Operational Experience of Essex STATCOM after Refurbishment**

J. BURROUGHS¹, J. Hu², B. Bisewski², Chris Root¹

¹Vermont Electric Power Co. Inc (USA)

²RBJ Engineering

CIGRE-165

 **Design Validation and Field-Testing Experience of Linear Shore Line Grounding Electrodes for Reliable Operation of HVDC Links**

A. DARIANI

SNC LAVALIN (Canada)

CIGRE-166

 **Improved Jiles-Atherton Hysteresis Model for Converter Transformer Controlled Switching Assessment in Nelson River Bipole III HVDC System**

C. Fang¹, A. D. Rajapakse², R. Jayasinghe³

¹Manitoba Hydro (Canada)

²University of Manitoba

³Manitoba Hydro International

CIGRE-167

 **Development of transmission voltage class, reconnectable 230 x 115 kV mobile transformers for improved reliability of power delivery**

T. KALICKI¹, W. ZIOMEK², K. VIJAYAN²

¹Hydro One Inc. (Canada)

²PTI Transformers LP

CIGRE-168

 **Implementation Experience of URTDSM Project in Indian Power System**

P.K. Agarwal, Rajkumar Anumasula, Chandan Kumar

Power System Operation Corporation Limited (India)

CIGRE-175

 **A Station Service Voltage Transformer Designed and Tested to Withstand a Severe Internal Arc Fault**

S. Brodeur¹, H. Dinh²

¹ABB Inc., Transformers (Canada)

²ABB Inc., High Voltage Products

CIGRE-176

 **[FR] Élaboration d'un système d'aide à la décision pour la gestion des actifs à TransÉnergie**

 **[EN] Development of a decision support system for asset management at TransÉnergie**

A. Côté, D. Messaoudi, D. Komljenovic, S. Alarie, O. Blancke,

J.-F. Boudreau, M. Gaha, E. Truchon, S. Pelletier

Hydro-Québec (Canada)

CIGRE-177

 **Assessing Water Content and Vibration from Dynamic Measurement in Transformer**

S. Akré¹, V. Behjat¹, P. Kung², I. Fofana¹

¹Research Chair on the Aging of Power Network

Infrastructure (ViAHT), UQAC (Canada)

²QPS Photonics

CIGRE-178

 **Secured Substation Protection & Automation IED Firmware Management**

ANCA CIORACA, MITAL KANABAR

GE Grid Solutions (Canada)

CIGRE-179

 **A Complete Average Value Model of Modular Multilevel Converter**

Jinling Qi¹, Haihao Jiang², Weixing Li¹, Boon-Teck Ooi²

¹Harbin Institute of Technology (China)

²McGill University

CIGRE-180

 **Increasing Transient Stability Limit by Nonlinear Damping Design**

Jinpeng Guo, Haihao Jiang, Xiaozhe Wang, Boon-teck Ooi

McGill University (Canada)

CIGRE-181

Real-Time Dynamic Protection Zone Determination for Interconnected Power Systems using Network Theory Principles

A.C. ADEWOLE¹, A.D. RAJAPAKSE¹, D. OUELLETTE²,
P. FORSYTH²

¹University of Manitoba (Canada)

²RTDS Technologies Inc.

CIGRE-183

The Research on the Key Equipment for 750kV Fixed Series Compensation in 3000m a.s.l.

CHEN Yuanjun, ZHOU Qiwen, WANG Dechang, Gao Jian,
Chen Wei, Zhang Daoxiong
NR Electric Co., Ltd. (China)

CIGRE-184

Ten Years of Experience with Natural Ester Dielectric Fluid in 245 kV: Shunt Reactor of Vilhena Substation - Eletronortheast

ROBERTO IGNACIO DA SILVA¹, IRAN PRADO ARANTES²,
ITO CAPINOS³, LUCAS DE OLIVEIRA¹, MAURÍCIO A. DE LIMA²,
GERALDO L. NICOLA⁴

¹Cargill (Brazil)

²Eletronortheast

³GE

⁴Consultant

CIGRE-185

Recognition of the benefits by the use of Transformers and Reactors immersed in insulating fluid with high fire point (K Class): the case of Fire Department of São Paulo state in Brazil

ROBERTO IGNACIO DA SILVA, ALEXANDRE COELHO
Cargill (Brazil)

CIGRE-186

Challenges Faced and Measures Adopted for RE Integration in Indian Power system

P.K. Agarwal, S.K. Jain
Power System Operation Corporation Ltd. (India)

CIGRE-187

Design optimization of a 138 kV transmission line with optical phase conductors

RICHARD MARANDA, GUILLAUME VACHON, BASSEM KAABIA
BBA Inc. (Canada)

CIGRE-188

Challenges Faced and Lessons Learnt in Development of Indian Electricity Markets and Regulations

S.K. Jain, P.K. Agarwal
Power System Operation Corporation Ltd. (India)

CIGRE-189

Method for Suppressing Current Spike in Wide Input Flyback converter

XIAO Yuwei¹, LIU Xuandong¹, SUN Wei², WU Bin¹

¹School of Electrical Engineering, Xi'an Jiaotong University (China)

²Wuyi University

CIGRE-190

[FR] Évolution numérique des systèmes de commande et de protection d'un poste électrique conformément à la norme 61850 ; Retour d'expérience d'un projet pilote ayant été pré-validé sur réplique avant son installation

[EN] DIGITAL TRANSFORMATION OF SUBSTATION THROUGH IEC61850 STANDARD: EXPERIENCE DEPLOYING DIGITAL SUBSTATION PILOT THROUGH DIGITAL SUBSTATION REPLICA

Saurabh Talwar¹, Eric Loiselle², David Lambert²,
William Boutin², Michel Lavallee², Felipe Sarubbi¹

¹Siemens Canada Limited (Canada)

²Hydro-Québec

CIGRE-191

Converter Transformer Cold Starts: Specification Nuances and Operational Impacts

C. MADSEN¹, B. KORBUTIAK¹, L. BENOIT¹, L. NEUMANN¹,
M. MIELKE¹, T. THOMPSON², K. WALKER³

¹ATCO Electricity Global Business Unit (Canada)

²Nalcor Energy

³Hatch

CIGRE-192

Investigating the Choice of Load Model and its Parameters for Different Voltage Response Scenarios in Large Power Systems

A. S. Hoshyarzadeh¹, H. Zareipour¹, P. Keung², S. A. Ahmed²

¹University of Calgary (Canada)

²Alberta Electric System Operator

CIGRE-193

New Methodologies for Accurate Modelling and Simulation of Advanced Telecommunication-Based Protection Schemes in a Software Environment

Hadi Khani, Daniyal Qureshi, Saman Alaeddini,

Ishwarjot Anand

Quanta Technology (Canada)

CIGRE-194

[FR] Amélioration de la durée de vie en fatigue du conducteur en utilisant une pince de suspension avec des élastomères coniques

[EN] Improved conductor endurance limit by using a suspension clamp with conical elastomers

J. PARADIS, P. VAN DYKE

Institut de Recherche d'Hydro-Québec (Canada)

CIGRE-195

A DER Management System for Distributing Power among Discretely and Continuously Controlled Devices within DER group

Chu Sun¹, Syed Qaseem Ali², Geza Joos¹, Francois Bouffard¹

¹McGill University (Canada)

²OPAL-RT Technologies

CIGRE-196

Multi-Feeder Protection Methodology and New Product Design for Distribution Substations

Kamyar Moghadam¹, Joshua Kuchison², Rainer Goblirsch³

¹Siemens Canada Limited (Canada)

²EPCOR Transmission

³Siemens AG

CIGRE-197

Con Edison Transmission System Reliability Model

R. Hasan¹, M. Viele¹, D. J. Allen²

¹Con Edison (USA)

²The Risk Research Group

CIGRE-198

[FR] Étude de cas d'analyse de la réponse en fréquence (FRA) pour l'évaluation de l'intégrité d'un transformateur usagé suite à une réparation

[EN] Case study for assessing the integrity of a service-aged transformer repair using Frequency Response Analysis (FRA)

R. S. A. FERREIRA¹, H. SIMARD², P. PICHER³, V. BEHJAT¹, I. FOFANA¹, H. EZZAIDI¹

¹Research Chair on Aging Power Network Infrastructure (ViAHT), Université du Québec à Chicoutimi (UQAC) (Canada)

²Énergie Électrique Rio Tinto, Saguenay-Lac-Saint-Jean

³Institut de recherche d'Hydro-Québec (IREQ)

CIGRE-199

Transmission Line Route Refinement with Simultaneous Geomorphological Assessment

Sébastien Paradis, Line Bariteau, Claude Roy
BBA Inc. (Canada)

CIGRE-200

Active Power Priority Vs. Reactive Power Priority Operating Modes in Solar Plants

M. DARYABAK, M. RAHMATIAN, K. KABIRI, K. CHILUKURI
PSC Consulting (Canada)

CIGRE-201

Mitigation of inrush and outrush currents in capacitor bank switching using dry type air core reactors

M. Goulkhan D. Caverly, M. Sharp
Trench Ltd (Canada)

CIGRE-202

The Energy Twin – A Solution for Techno-Economic Business Case Analysis of Microgrids & Distributed Energy Systems (DES)

Bharatkumar Solanki, Alif Gilani
Siemens Canada Limited (Canada)

CIGRE-203

Field Validation of Various Line Rating Methods on a 138 kV Transmission Line in British Columbia

M. L. Lu, C. Singh, R. Barone, K. Zhang, M. Guite,
D. Chakrabarti
BC Hydro Power & Authority (Canada)

CIGRE-207

Paradigm Shift in Operational Philosophy of POWERGRID

SUNIL AGRAWAL, P.K. SRIVASTAVA, SUNIL KUMAR,
MANOJ KUMAR, VIKAS BISHNOI, ABHISHEK BHARDWAJ
Power Grid Corporation of India Limited (India)

CIGRE-208

Voltage Source Converter (VSC) Operation at DC Lines close to AC Lines

M. Weiland, E. Starschich, G. Ebner, R. Teixeira Pinto,
M. Schmidt
Siemens AG (Germany)

CIGRE-209

Web Applications for Transmission System Asset Health Monitoring

Sunil Agarwal, P.K Srivastava, Sunil Kumar, Manoj Kumar,
Abhishek Bhardwaj, Vikas Bishnoi
Power Grid Corporation of India Limited (India)

CIGRE-213

Active Filtering of harmonic voltages or currents utilizing a MMC STATCOM-Design Aspects and Performance Experience

T. Schlegl, Dr. G. Pilz
Siemens AG (Germany)

CIGRE-214

Steel foundations design optimization of a 138 kV transmission line

MAXIME SANSFAÇON¹, RICHARD MARANDA²,
GUILLAUME VACHON²

¹EMS Ingénierie (Canada)

²BBA Inc.

CIGRE-217

Energy Storage and Ancillary Services Markets in North America

Hisham Alharbi, Kankar Bhattacharya
University of Waterloo (Canada)

CIGRE-218

Reduction of CLPU Overload through Active Load Management

S. DZELETOVIC, F. BOUFFARD, G. JOOS
McGill University (Canada)

CIGRE-219

Use of GIS Tools and Space Technologies for Optimal Transmission Line Routing and Asset Mapping

B. N. De. Bhowmick, V. K. Bhaskar, S. B. R. Rao, Pradeep Patil,
Pradeep Singh Chauhan, Shalini Raj
Power Grid Corporation of India Limited (India)

CIGRE-220

Transformation of a Large Diameter Monopole to a Pinned Support Guyed Tower

Pierre-Luc Massé, Richard Maranda, Alireza Aboutalebi
BBA Inc. (Canada)

CIGRE-221

Magnetic and Thermal Impact of GIC on Power Transformers: A Case Study

TR. Girgis¹, M. Saad², E. teNyenhuis², C. Clark³

¹ABB Inc. (USA)

²ABB Inc. (Canada)

³Altalink (Canada)

CIGRE-223

HVDC O&M Strategy

D. KAVANAGH¹, C. MADSEN², D. KELL³

¹Nalcor Energy (Canada)

²ATCO Electricity Global Business Unit

³Hatch

CIGRE-225

Research on Key Technical Parameters of Main Equipments for UHV Converter Station in High Altitude Area
 Zhang He, Wu Fangjie, Shen Xiaolin, Yue Bo, Yang yiming, Wang yaoxuan
 State Grid Economic and Technological Research Institute Co., Ltd. (China)

CIGRE-226

Substation Anomaly Detection System – A Substation & Distribution Network Cybersecurity Early Warning System
 Eric Hawthorne¹, Moein Manbachi¹, Alif Gilani²
¹British Columbia Institute of Technology (BCIT) (Canada)
²Siemens Canada Limited

CIGRE-227

A COORDINATION CONTROL BETWEEN SVC AND BUS/SHUNT REACTORS
 LOKESH CHUNDAWAT, ALOK SHARMA
 Power Grid Corporation of India Ltd (India)

CIGRE-228

Synchronous Generator Load Sharing Models for Diesel-Based Remote Systems
 JASON A. ZRUM, MICHAEL ROSS
 Yukon Research Centre – Yukon College (Canada)

CIGRE-229

[FR] Étude préliminaire de fluide à base d'ester pour application dans des transformateurs exploités en région climatique froide
[EN] Preliminary Study of Ester-based Fluid for Application in Transformers Serving in Cold Climatic Regions
 U. Mohan Rao¹, I. Fofana¹, T. Jaya¹, E. M. Rodriguez Celis², J. Jalbert², B. Noirhomme², P. Picher²
¹Research Chair on the Aging of Power Network Infrastructure (ViAHT), Université du Québec à Chicoutimi (Canada)
²Institut de recherche d'Hydro-Québec (IREQ)

CIGRE-230

MiGen Project – Empowering the transformation at the grid edge

SIEMENS

Ingenuity for life

Navigating today's and tomorrow's energy landscape

The utility industry is undergoing profound changes, affecting the entire energy chain, from power generation to trading, including transmission and distribution. With a proven track record in business transformation and the industry's most comprehensive portfolio from generation all the way to consumption, Siemens Canada is your trusted partner helping you navigate the energy transition.
